

EDUCATION

University of North Carolina at Charlotte – Charlotte, NC

Class of 2027

Bachelor of Science in Data Science; Minors: Artificial Intelligence, Statistics

Relevant Coursework: Database Design & Implementation; Applied Multivariate Analysis; Predictive Analytics; Matrices & Linear Algebra

Honors and Awards: Dean's List, Fall 2025

SKILLS

- Technical Skills: Java; Python; R; SQL; pandas; scikit-learn
- Platforms & Tools: Airtable; Make.com; Supabase; HighLevel; AutoCAD; Excel; Git/GitHub; Office 365

EXPERIENCE

Cacheconomy – Charlotte, NC

Mar 2026 – Present

Data Science & Automation Intern (MarTech / local SEO platform)

- Lead data pipeline design, automation, and analysis at Cacheconomy, helping local businesses manage their online reputation and directory listings, working independently across the company's marketing and research initiatives
- Automated data ingestion via Make.com, building data quality controls, including duplicate detection and validation logic, to ensure completeness and accuracy
- Designed and built two Airtable databases from scratch to power a Charlotte MSA event feed: a 51-organization tiered directory with a 60+ event tracking table
- Authored a project scoping document for an SB 257 business impact analysis across ~673,000 NC business records; designed a tiered qualitative impact-rating methodology as a transparent alternative to unsupported revenue-based forecasting
- Built a proof-of-concept pipeline using ProPublica's Nonprofit Explorer API to clean and cluster 501(c)(6) organization records, demonstrating a scalable approach for the full organization dataset

Advocations – Charlotte, NC

Mar 2026 – Present

Data Science & Automation Intern (career services & disability-focused job placement)

- Maintain a blended data science and automation role alongside Cacheconomy under the same manager, extending shared infrastructure and analytical frameworks to Advocations' placement and legislative research initiatives
- Built and maintain the "Advocations — Event Submissions" Airtable base, tracking approximately 20 events for future Eventbrite automation
- Extended the SB 257 impact-rating methodology to analyze federal Section 503 disability-hiring rule changes, supporting Advocations' job placement mission

Artificial Neural Networks & Gaussian Processes Research – UNC Charlotte

August 2026 – Present

Research Assistant

- Conducted a literature review on functional data analysis and deep Gaussian processes for active vs. resting-state brain research
- Studied Bayesian approximation via dropout, functional regression convergence theory, and deep Gaussian process architectures with Vecchia-based scalable inference
- Implemented and tested baseline neural network architectures in PyTorch as a foundation for upcoming modeling work

PROJECTS

NC Senate Bill 257 Economic Impact Research – Charlotte, NC

August 2026 – Present

Independent research connected to the Cacheconomy internship

- Leading a multi-phase legislative-impact analysis of NC Senate Bill 257 on the Charlotte-area business community ahead of an upcoming Charlotte City Council presentation
- Reconciled and spatially joined 2,350 raw municipal boundary fragments into 462 verified neighborhoods across 7 city council districts to surface socioeconomic disparities relevant to the bill's impact
- Researched and categorized 301 regional trade organizations into 22 industry clusters, cutting unclassified records by approximately 66% through a documented manual methodology

NFL Predictive Market Analytics Pipeline – Charlotte, NC

June 2026 – August 2026

Independent Project

- Built a full-stack Python pipeline integrating live odds (The Odds API) and historical NFL data (nflreadpy) covering 2010–2025 seasons
- Engineered a Random Forest model (5-feature set: EPA differential, turnover margin, rest days, QB continuity) reaching ~62.3% mean accuracy across 8-season walk-forward cross-validation
- Identified and quantified pricing discrepancies across market data providers, applying a statistical arbitrage approach with Kelly criterion position sizing across a modular 10+ script architecture

LEADERSHIP AND COMMUNITY INVOLVEMENT

UNC Charlotte Mentor Collective – Charlotte, NC

August 2026 – Present

Mentor

- Serve as a mentor to two mentees, guiding them through academic and career goal-setting using structured discussion frameworks and campus resource navigation

Aaj Ka Dhamaka (UNC Desi Dance Network) – Chapel Hill, NC

2024 – 2025

Logistics and Operations Head

- Directed end-to-end logistics for a multi-team dance network, including bookings, venues, and scheduling
